· **Additional ecological information:**· **General notes:**

*Water hazard class 1 (German Regulation) (Self-assessment): slightly hazardous for water*

*Do not allow undiluted product or large quantities of it to reach ground water, water course or sewage system.*

*Must not reach sewage water or drainage ditch undiluted or unneutralised.*

*Rinse off of bigger amounts into drains or the aquatic environment may lead to increased pH-values. A high pH-value harms aquatic organisms. In the dilution of the use-level the pH-value is considerably reduced, so that after the use of the product the aqueous waste, emptied into drains, is only low water-dangerous.*

### SECTION 13: Disposal considerations

· **13.1 Waste treatment methods**· **Recommendation**

*Must not be disposed together with household garbage. Do not allow product to reach sewage system.*

*Must be specially treated adhering to official regulations.*
